

## Text and topology in in human interaction networks: differences among Erdős sectors and correlation of metrics (Supporting Information document)

Renato Fabbri<sup>1, a)</sup>

*São Carlos Institute of Physics, University of São Paulo (IFSC/USP), PO Box 369, 13560-970, São Carlos, SP, Brazil*

(Dated: 11 November 2015)

### CONTENTS

<b>SI. Measures</b>	1
A. General characteristics of activity distribution among participants	1
1. Snapshots of 1000 messages	1
2. Snapshots of 2000 messages	10
B. POS tags and wordnet synsets	15
1. Snapshots of 1000 messages	15
2. Snapshots of 2000 messages	47
C. Differentiation of the texts from Erdős sectors	79
1. Snapshots of 1000 messages	79
2. Snapshots of 2000 messages	96
D. Correlation of topological and textual metrics	104
1. Snapshots of 1000 messages	104
2. Snapshots of 2000 messages	121
E. Formation of principal components	130
1. Snapshots of 1000 messages	130
2. Snapshots of 2000 messages	148

This Supporting Information document exposes extensive measurements on interaction networks erived from email lists, Twitter, Participabr and IRC.

### SI. MEASURES

#### A. General characteristics of activity distribution among participants

##### 1. Snapshots of 1000 messages

TABLE S115. Percentage of synsets with each of the POS tags used by Wordnet. The last lines give the percentage of words considered from all of the tokens (POS) and from the words with synset (POS!). The tokens not considered are punctuations, unrecognized words, words without synsets, stopwords and words for which Wordnet has no synset tagged with POS tags. Values for each Erdős sectors are in the columns **p.** for periphery, **i.** for intermediary, **h.** for hubs. TAG: 3

TABLE S143. Percentage of synsets with each of the POS tags used by Wordnet. The last lines give the percentage of words considered from all of the tokens (POS) and from the words with synset (POS!). The tokens not considered are punctuations, unrecognized words, words without synsets, stopwords and words for which Wordnet has no synset tagged with POS tags . Values for each Erdős sectors are in the columns **p.** for periphery, **i.** for intermediary, **h.** for hubs. TAG: 11

TABLE S156. Percentage of synsets with each of the POS tags used by Wordnet. The last lines give the percentage of words considered from all of the tokens (POS) and from the words with synset (POS!). The tokens not considered are punctuations, unrecognized words, words without synsets, stopwords and words for which Wordnet has no synset tagged with POS tags. Values for each Erdős sectors are in the columns **p.** for periphery, **i.** for intermediary, **h.** for hubs. TAG: 15
